IMPRESS EVENTS

Website Development Proposal

Platform: Shopify
Project: Wedding & Event Rental Catalogue with Quotation Request System
Website: https://impresseventrentals.com/

1. Project Overview

The objective of this project is to develop a professional, modern, and mobile-responsive website for Impress Events, a company specialising in wedding and event item rentals.

The website will be developed using Shopify, allowing customers to browse rental products, select multiple items, add them to a quotation cart, and submit a quotation request online.

Unlike a traditional e-commerce website, this platform will not require online payments or a payment gateway. Instead, customers will submit their selected products and event details to the business owner, who can review the request, confirm availability, and provide a quotation.

2. Proposed Website Structure

2.1 Home Page

- Brand introduction and overview of Impress Events.
- Featured rental products and categories.
- Promotional banners and event-related imagery.
- Clear navigation to the product catalogue.
- Calls to action encouraging customers to explore rental products and request quotations.

2.2 Products / Rental Catalogue

- Complete catalogue of available rental products.
- Product categories and collection pages.
- Product images and descriptions.
- Rental prices displayed where applicable and approved by the client.
- Individual product detail pages.
- Product quantity selection.
- Add to Quote Cart functionality.

2.3 Contact Us Page

- Contact form.
- Business email address and telephone number.
- Social media links.
- Business location details, if provided by the client.

2.4 Policy Pages

The website will include the necessary policy pages based on the client's business requirements:

- Privacy Policy.
- Terms and Conditions.
- Rental Policy.
- Cancellation, Damage and Refund Policy.

The client will provide or approve the policy content to ensure it reflects the actual business practices.

3. Product Selection and Quotation Request System

The website will include a quotation-request process designed specifically for rental enquiries.

Customer Workflow

1. Customers browse the rental product catalogue.
2. Customers select products and quantities.
3. Selected items are added to a quotation cart.
4. Customers review their selected items and quantities.
5. Customers complete a quotation request form with their contact and event details.
6. The quotation request is submitted to the business owner by email.
7. The business owner reviews the requested products, checks availability, and responds to the customer with a quotation.

Quotation Request Form

The form will collect the following information:

- Customer name.
- Email address.
- Contact number.
- Event type.
- Event date.

- Event location.
- Selected products and quantities.
- Additional requirements or notes.

The business owner will receive the submitted product list and customer information to review the request and prepare a quotation.

The quotation-request functionality will be implemented using a suitable Shopify application or an agreed custom solution.

Note: Submitting a quotation request will not automatically confirm a booking or reserve rental items. Availability and final pricing will be confirmed by the business owner.

4. Shopify Configuration and Development

The project will include:

- Shopify store configuration.
- Theme setup and website styling.
- Home page and required page development.
- Product catalogue and collection configuration.
- Product detail page setup.
- Quotation cart functionality.
- Quotation request form integration.
- Email notifications for quotation requests.
- Customer submission confirmation.
- Contact form configuration.
- Policy page setup.
- Responsive design for desktop, tablet, and mobile devices.

5. SEO and Performance Optimisation

The website will include foundational search engine optimisation to improve its technical structure and search visibility.

This will include:

- Page titles and meta descriptions.
- Heading structure optimisation.
- Image alt text where applicable.
- Basic URL and page structure optimisation.
- Image compression and optimisation.
- Basic website speed optimisation.
- Mobile responsiveness checks.

SEO work will establish a foundation for search engine visibility but will not guarantee specific search rankings or traffic levels.

6. Analytics and Tracking Setup

The following services will be configured, subject to the required account access:

- Google Analytics integration.
- Google Search Console setup.
- Shopify Analytics configuration.
- Basic website indexing and sitemap checks.
- Cookie-consent management where required for the website's analytics, marketing tools, and target markets.

Any paid third-party applications required for these services will be confirmed with the client before installation.

7. Project Deliverables

The completed project will include:

1. Shopify website setup and configuration.
2. Home page.
3. Products and rental catalogue.
4. Product detail pages.
5. Quotation cart and quotation request form.
6. Contact Us page.
7. Required policy pages.
8. Email notifications for quotation requests.
9. Mobile-responsive website layout.
10. Basic SEO and performance optimisation.
11. Google Analytics and Search Console setup.
12. Website testing and launch assistance.

8. Estimated Project Timeline

The estimated development period is approximately **2- 4 weeks**, beginning after receipt of the required content, account access, and approvals.

The timeline may vary depending on product volume, application configuration, additional requirements, and client feedback.

9. Client Responsibilities

The client will be responsible for providing:

- Logo and brand assets.
- Product names, descriptions, categories, and images.
- Rental prices, if prices are to be displayed.
- Business contact information.
- The email address for receiving quotation requests.
- Event information requirements for the quotation form.
- Policy content or approval of the drafted policy wording.
- Access to the Shopify account, domain, and relevant Google accounts.
- Timely feedback and approval during development.

10. Investment and Recurring Costs

Website Development Fee: LKR

Monthly Website Maintenance: LKR

The following costs will be confirmed separately where applicable:

- Shopify subscription.
- Domain registration or renewal.
- Paid Shopify themes or applications.
- Third-party service subscriptions.
- Additional custom development outside the agreed scope.

Shopify and third-party application subscriptions will be paid by the client. Final subscription costs may vary depending on the selected plan, billing terms, exchange rates, and applicable taxes.

11. Website Maintenance

Ongoing maintenance may include the following, subject to the agreed maintenance package:

- Basic technical & Security checks.
- Assistance with existing website functionality.
- Basic troubleshooting and support.

New features, major design changes, extensive catalogue updates, and additional integrations will be quoted separately.

12. Scope Exclusions and Conditions

The following are excluded unless separately agreed:

- Payment gateway integration.
- Online payment collection.
- Standard customer checkout for paid orders.
- Automatic booking confirmation or inventory reservation.
- Live rental availability management by event date.
- Automated rental-duration pricing.
- Automated delivery and collection fee calculations.
- Advanced quotation management dashboards.
- Customer account functionality.
- Legal consultation or preparation of legally reviewed policy documents.
- Paid third-party applications and additional custom features not included in the agreed scope.

Any additional functionality requested after approval of the scope may require additional development time and cost.
